

II
Sonneborn mss. II
Manuscripts Department, Lilly Library
Indiana University, Bloomington, Indiana

Dear Sonneborn, could you let me have the reference^{May 6, '49}
to Statement obituary notice in which he mentions Geyers
results on mutations induced by antisera? I could not find
it in the Biol. Bull.

Hop[e] you returned without mishap. I am now steeped in
literature on physiol. Genetics, coming to it next week in the
talks at the Med. School. Wish I could ask you many questions.
I think it is a depressing subject, as yet. Luria is coming
today. Maybe he will cheer me up.

Discovered that I left my hat at John's cousin. Hope to
retrieve it when we take Luria there.

Had another note from Ephrussi. Says he is now really going to
leave for England soon. Sincerely N. Dethlefs
